Indicates styles shipped from Australia & NZ. Styles without this symbol are shipped from overseas with an approximate 3 week delivery time, depending on availability. Extra freight charges apply.

STYLES AVAILABLE IN DOUBLE DEPTH

These shoes have been built an extra 7mm deeper than other shoes in the range. Made specifically for patients who require extra depth footwear.

Sizing Tips

- A** The thicker liner in our athletic line and hiking boots may make these styles feel **more snug** than others. We suggest ordering 1/2 or full size larger to achieve a similar fit.
- B** These styles run true to size.
- C** These shoes have a lower heel counter than other styles and do not push the foot as far distally. We suggest ordering 1/2 size shorter to achieve a similar fit.
- D** These shoes have Lycra in the upper which can make the shoe feel roomier. Depending on your client, these may need to be ordered 1 width narrower to prevent slippage.
- E** These shoes have a roomier toe box and a snugger fitting heel. We suggest ordering one width narrower or 1/2 size shorter to achieve a similar fit.
- F** These shoes are Double Depth and also open to the toe. Ideal for patients who either utilise a brace, such as an AFO, have a fused ankle or oedema.

Sizes
